Management Services

Who We Are

We are a diverse company with expertise in engineering, planning, survey, construction management, program management, project management and procurement. From infrastructure development and expansion to complex toll road design and funding, we have a 65-year reputation for providing quality services, delivered in a responsive and cost competitive manner for both public and private sector clients.

We help our clients plan, develop, design, construct, operate and maintain their critical facilities and infrastructure. **Let us show you just how good we are.**

Our Commitment

Our first client started with a handshake and we begin every job the same way. Our word is our bond and our success is based on providing the best quality at a fair price.

EXCELLENCE: We are committed to providing high-quality services – infusing excellence in everything we do. We make sure we understand our client’s needs and deliver the right service from the beginning.

INNOVATION: To generate the greatest value for our clients, we think and respond outside traditional boundaries – pursuing creative solutions, and leveraging technology.

CONTINUOUS IMPROVEMENT: We continually challenge ourselves to improve our services, processes, and procedures with the goal of creating the best value for our clients, communities, and career-building experiences for our employees.

What We Do

In an increasingly complex world with competing demands for limited resources, WTC offers customized solutions using sound science, a clear understanding of expectations, innovation and industry-leading approaches.

Our strength is our ability to serve our clients, from planning to project completion, providing continuity of vision and an outcome that exceeds expectations.

Our approach is “boots on the ground”. We lead by example and provide support in getting the project

completed in a timely and efficient manner, with a keen focus on budget and quality. On the majority of our projects we provide management in addition to design services. Our involvement, from beginning to completion, ensures the design is accurately implemented and the finished product is what you expect.

We are committed to finding solutions without sacrificing quality. From initiation of the project through design development to funding sources, we are dedicated to an efficient process for the overall project, not just a single task.

Engineering & Survey

Clients depend on WTC for the design and maintenance of practical and easy to operate solutions that lead to tangible benefits in their organizations. We bring a level of expertise that few companies can match.

We provide advanced engineering solutions to meet the demands of our client’s expanding populations and infrastructure requirements—this is an integral part of how we conduct our business as a firm. We provide reasonable solutions and consider their associated environmental and social impacts.

Our clients come to us for solutions to a wide range of situations—complex and simple—and we help them move from concept to completion and beyond. We take pride in solving our clients’ problems as if they were our own.

Design & Management

We start with your idea, analyze it, improve it, and implement it with minimal risk, if any. We operate with total transparency. Our principles mean we never have to wonder what to do. **We simply do the right thing, the first time, every time.**

VALUE: We strive to understand your goals in order to achieve the right balance of cost, functionality, quality, and time.

QUALITY: WTC follows a detailed quality program to ensure the design is right from the start and is maintained throughout the life of the project. Our reputation is a reflection of the quality of our work.

MANAGEMENT

We focus on achieving optimal results for our clients, a vision that consistently sets us apart in the industry. We stay on the cutting edge technologically and philosophically, often applying strategies that go against traditional methods. Over time, our strategies have invariably generated more value for our clients and we continually look for ways to improve on the results.

Our Handshake is Our Word

Through our wide-ranging work, we've come to appreciate the needs of all stakeholders regardless of the project scale. At any one time, we may be designing infrastructure in far west Texas while elsewhere we are rethinking wildlife habitats along a proposed highway route. So when it comes to multifaceted projects WTC brings a truly balanced approach to the management of a project. Our key personnel will be there, fully committed to every project.

Our primary role is to look out for our client's best interests.

WTC's level of expertise emerges from concrete understanding of what is done, how it is done, and why it is done a particular way.

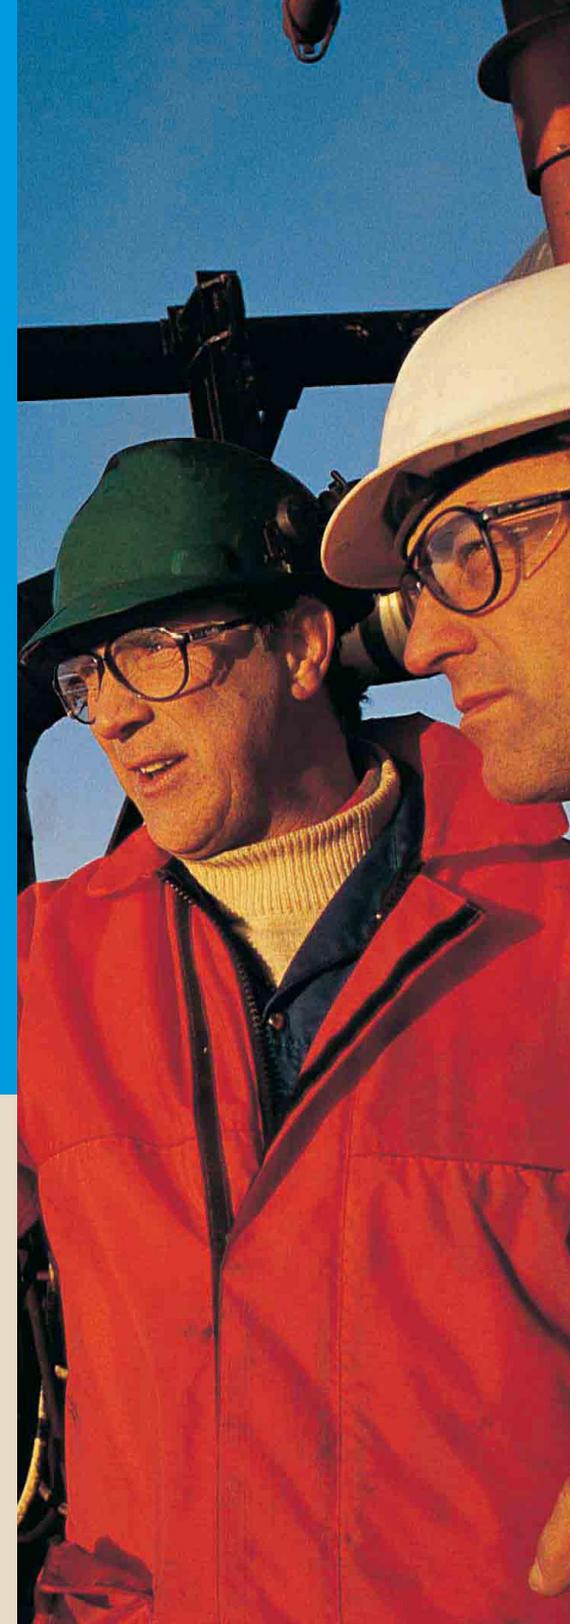

- Planning begins early and continually evaluated against metrics.
- Project goals operate as the benchmark from which your satisfaction is measured.
- Compliance with the goals is monitored through every phase of the project to ensure they are being achieved.

"Engineering goes beyond planning and design."

"Engineering goes beyond planning and design. It should include building a relationship, talking to each other and helping with those tough jobs, like keeping the public happy. I love my job."

~ Bonnie Moss, PE

Regional Manager - Houston

Management goes beyond a single task, at least it should. From the program to final costs, every element is the responsibility of the team. If it isn't, then you have the wrong team.

A diverse company that can contribute to every phase of a project, equals a "one stop shop." Having familiarity with each step of the project lessens the amount of last minute surprises, increases productivity which means, less headache for the client.

CONSTRUCTION & PROJECT MANAGEMENT

We ensure a project's success by meeting expectations. By managing risks and controlling costs, our team can focus on achieving the end result while monitoring the ongoing details. This comprehensive management, at every stage of the project, includes pre-construction planning, complete construction oversight, and post-construction services. We focus on improving schedule performance, controlling and reducing costs, minimizing risks, and ensuring quality.

PROGRAM MANAGEMENT

We are committed to finding solutions to meet all requirements without sacrificing quality. From initiation of the project through design development, to funding sources, we are dedicated to an efficient management process for the overall project, not just one task. WTC brings detailed design standards along with best practices that include detailed tracking of projects and project performance specifically matched to our client's goals and objectives.

FEDERAL AND STATE FUNDED PROJECTS

Our experience includes TCDBG, Texas Water Development Board, State Revolving Fund Program, Rural Water Authority Programs, Federal Wastewater Treatment Grant Program, and the newly formed Transportation Infrastructure Program.

Task	Start	End
WP1: Inception Study		
WP2: Environment - Need Assessment		
Sub-contractor selection and Award		
Detail work activity		
Review and finalization by TPF		
WP3: Seminar / Workshop
